EDUCATION

The University of Texas Rio Grande Valley

Aug. 2024 – May 2027

Bachelor of Science in Computer Science

Relevant Coursework: CSCI 1470 (CS1 in C++), CSCI 2380 (CS2 in C++), CSCI 3333 (DSA in C++), CSCI 3340 (Software Engineering I), CSCI 2333 (Assembly), CSCI 3310 (Discrete Math)

Texas A&M University

Aug. 2023 – May 2024

General Engineering

Relevant Coursework: ENGR 102 (CS1 in Python), Math 151 (Calculus 1)

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, HTML, CSS

Technologies: React, Firebase, Git, NumPy, Matplotlib

EXPERIENCE

Information Security Apprentice | UTRGV

Aug. 2024 – Aug. 2025

- Assisted in monitoring security systems and reviewing logs to identify potential security incidents.
- Supported security audits by gathering data and documenting findings under supervision.

SI Leader for POLS 206 | Texas A&M University

Jan. 2024 – May 2024

- Provided tailored tutoring and study strategies to over 100 students, contributing to improved exam performance.
- Developed concise study guides and facilitated weekly review sessions, leading to higher student retention.

PROJECTS

FreightLink (In Progress)

Aug 2025- Present

- Prototyping a small web app that matches local freight loads with available drivers.
- Building an MVP with basic load-matching, simple email alerts, and experimental AI chat for driver-dispatcher communication.
- Exploring ways to add automated rest tracking and lightweight scheduling features.

JobSync | React, Firebase, Gemini API

Sept. 2024

- Developed a web application in 24 hours at the Frontera Devs Hackathon using React, Firebase, and the Gemini API to streamline job searches.
- Built a feature that takes a resume and a job description, then uses Gemini to gauge how well the resume aligns with the listed requirements.
- Added a separate tab that suggests potential career roles based on resume content, making it easier for users to discover relevant opportunities.

ACTIVITIES

CodePath Intermediate Technical Interview Prep | Algorithms, Data Structures

Feb. – Apr. 2025

- Focused on data structures and algorithms with weekly LeetCode-style challenges and advanced problem-solving exercises.
- Refined solution efficiency by emphasizing time complexity, supported by peer code reviews and live demos.

CLUBS

Frontera Devs | Lead

Aug. 2024 – Present

- Organize coding workshops and hackathons to foster collaboration, hands-on learning, and professional development among students.
- Mentor new members on best practices for software development and teamwork, encouraging innovation and community engagement.

Data Structures & Algorithms Architects | Vice-President

Aug. 2024 – Present

- Plan and lead algorithmic problem-solving sessions and mock interviews to strengthen members' coding and analytical skills.
- Coordinate workshops on data-structure design and competitive programming to promote collaboration and technical growth.

ColorStack @UTRGV | Founder & Parliamentarian

Aug. 2025 – Present

- Established the first UTRGV chapter of ColorStack, building a supportive community for under-represented computer science students.
- Oversee chapter operations, organize networking events, and guide members through professional development and internship preparation.
